The Ethics of Integrated Data

“Integration and subsequent use of new data for evidence informed policy....how to balance and individual’s privacy with the critical role population-level information provides....”

20th Annual Privacy and Security Conference
February 8, 2019
Victoria, BC

Kenneth A. Moselle, PhD, R.Psych.
Director, Applied Clinical Research Unit
Island Health
When the questions get tough, the tough create frameworks.
Population Health Perspective on the chain that links evidence to policy and policy to the public good.

Distal Information Determinants of Policy → Distal Information Determinants of Policy → Proximal Information Determinants of Policy → Policy & Procedures → Performance Monitoring

Integrated Evidence

- Evidence – e.g. from Health - Administrative
- Evidence – Health Authority Transactional Service Data
- Evidence - Finance
- Evidence – Social Development & Poverty Reduction

The foundation of evidentiary foundations - people
Restoring balance - to make the situation good again (assuming it was good in the first place) – in two possible ways (Piaget – “reversibility”)

• By *inversion* (remove some weight) –

• By *reciprocity* – add some compensating weight to the other pan –
Example-target information architecture for health service system
Target Information Architecture – Health Services Information Products
