

Excelleris Technologies:
Leading the Exchange of Health
Information Across the Community
of Care in British Columbia.

Connecting Healthcare Systems

Excelleris electronically connects healthcare providers and patients with vital healthcare information to support informed decision-making.

Excelleris did you know?

Is an extensive eHealth network that connects patients, providers and major public and private healthcare systems in B.C.

Operates B.C.'s most popular personal health information web portal (my ehealth).

Provides access to relevant data at the point of care through a secure web client (launchpad) or EMR.

Proven solution, in use today, by physicians and patients.

Connecting—Transmitting—Delivering
