

EMPOWERING PATIENTS THROUGH REMOTE PATIENT MANAGEMENT

Michael Craig

JUNE 2019

WHAT IS REMOTE PATIENT MANAGEMENT

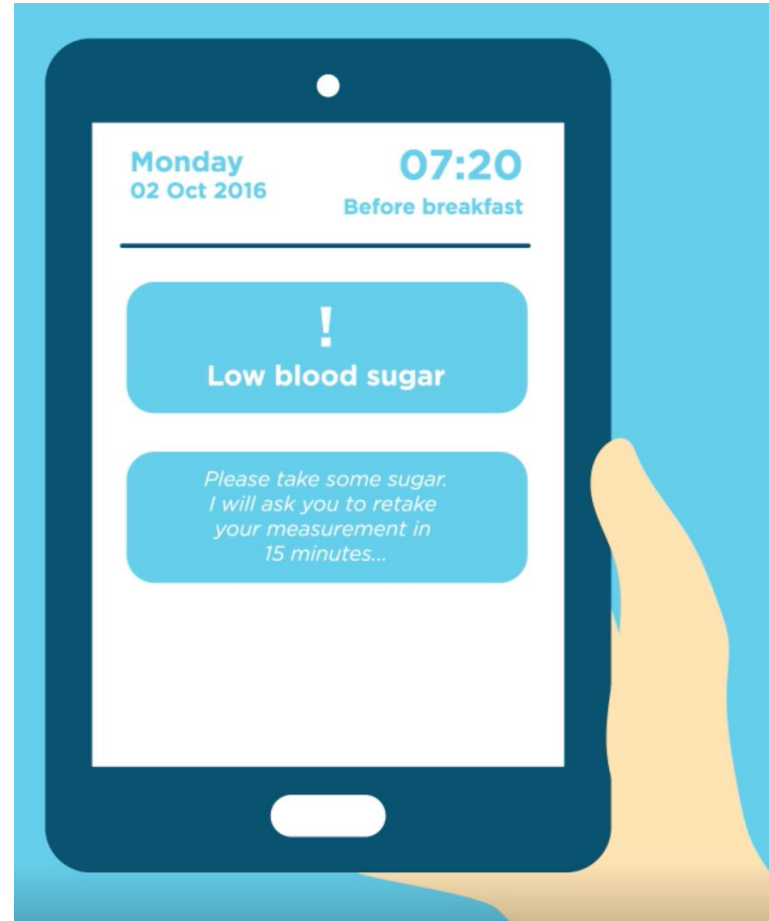

- Tailored Monitoring Plan
 - real time feedback
 - Health activities
 - Medication adherence activities
 - Reminders / Alerts
- Used at home - Any internet device – Portal / Tablet / Smartphone
- Integration with medical devices (blood glucose etc)
- Connectivity to Health Provider maintained

Personal Health Assistant

REMOTE PATIENT MANAGEMENT BENEFITS

- Patient Education – Teachable Moments
- Simple Care Plan to follow
- Exceptions sent to Health Provider in Real Time
- Patient stays at home – Increased happiness
- Decreased Hospital Visits (reduced trips / parking)
- Not a huge project (not CIS)

PATIENT EMPOWERMENT

- Actively engaged in monitoring
- Sense of Security
- Develop self-reliance
- Satisfaction equal (or better) to dedicated caregiver
- Routine established and maintained after program
