

ISACA Mentorship Program 2023

Benefits

- ▶ Receive monthly guidance from one or multiple experienced, successful ISACA mentors
- ▶ Learn the benefits and the first-hand experience of being a certified IT audit / IT security professional
- ▶ Network with other mentors and mentees in the local community and expand your professional network!
- ▶ Have the opportunity to participate in online discussion forums with experienced cybersecurity professionals.

General Requirements

- ▶ Must be committed to meet at least twice a month with your mentor/mentee
 - ▶ Please note: it is the mentee's responsibility to reach out and schedule an appropriate time to meet with your mentor
- ▶ Attending the social get-togethers is completely voluntary, but we promise they will be fun!

She Leads Tech - Nourishing Minds and Careers

Join ISACA SheLeadsTech Vancouver in celebrating International Women's Day in a thought-provoking and engaging discussion on Mental Health and Wellness in the workplace, with a focus on creating healthy work-life balances and managing stress.

Our evening will include a guided meditation, and provide ample opportunities for attendees to connect and engage with each other!

All proceeds will go towards ISACA SheLeadsTech scholarship fund this upcoming year.

ISO 27001: An Overview of the 2022 updates and extensions

KPMG and ISACA Vancouver are pleased to invite you to an in-person education session to learn about ISO 27001

During this session, Tumainiel Malisa and Eric Rae will cover an overview of ISO 27001 along with the key updates that were introduced in 2022, and how it impacts those who are pursuing certification.

ISACA High Schools Hackathon

- Students can form their own teams of 2-4 or join on their own to be placed with another team to develop their penetration testing skills.
- There is no cost to participate and we have some great prizes again lined up for the top 3 teams.
- We have a recorded session on how students can set up their own lab in advance, which will be sent out upon registration.
- The morning of March 4 is dedicated to how to approach different types of flags with the competition running in the afternoon.

KEY FINDING #3: SCHOOLS NOT EXPANDING CYBERSECURITY PROGRAMS

“most institutions in our study are not introducing an increasing share of their course offerings in cybersecurity or privacy as compared to 2016.”

Academic Partnership

ISACA's Academic and Workforce Partnership Program partners with schools, colleges and universities around the globe to give students the opportunity to enhance their learning experience through a customizable program

The ISACA Academic and Workforce Partnership Program's mission is to level the global playing field for all members of society by focusing on maximizing social benefits rather than profits by convening the IT workforce and understanding their needs

We firmly believe there is no "one size fits all" approach to IS/IT/CS education. Our Academic Partnership Program offers several course delivery options that allow your students to train according to their needs with ISACA-supplied and approved course content, labs and exams.
